Diagram illustrating a second embodiment of the device. It features a similar structure to the first embodiment, with a main body (60d) and a lower section (61d). The lower section is connected to a base (64d) which is further connected to a support structure (7d). The base is shown with a series of small, rounded protrusions (6d) along its length. The support structure (7d) is shown with a series of small, rounded protrusions (6d) along its length. The base is also connected to a side structure (15d) and a top structure (14d).
